Forecast for Saturday 30 Apr 2022

Weather: Clear skies during the early hours and becoming cold with a fairly widespread frost in the valleys. Soon warming up after dawn with sunny skies for much of the morning. Becoming cloudier during the afternoon, initially still bright, but turning increasingly overcast by the evening.

Chance of cloud-free hill tops above 600m: 100%, falling to 60% from 2100.

Low cloud and visibility: A few shallow fog patches in the valleys around dawn, this soon dispersing. All hills and mountains will be cloud free throughout daylight hours. Generally good visibilities are expected, although some distant hills will appear quite hazy.

Meteorologist's View

Despite skies turning cloudier during the afternoon, UV levels will be moderate or high, so it's worth wearing sun protection if you're planning on spending the day in the mountains.

Forecast for Sunday 01 May 2022

Weather: Periods of rain through the early hours, possibly heavy at times. Damp on Sunday morning with low cloud, mist and hill fog and further periods of rain and drizzle. Staying cloudy with extensive mist and fog over the hills and further outbreaks of rain and drizzle during the afternoon and evening, this possibly persisting for several hours in some areas.

Maximum wind: Southwesterly 15-20 mph

Chance of cloud-free hill tops above 600m: 20% or less.

Low cloud and visibility: Persistent cloud above 400-500m for most of the day with periods above 200-300m at times. This will give widely very poor visibility on most hills and mountains with visibilities in the valleys also poor at times during periods of rain and drizzle.

Temperature: **Valleys:** Plus 6 Celsius rising to plus 12 Celsius.

At 600m: Plus 7 Celsius.

Freezing level: Above the summits.
